

**JOHN TAYLOR**  
SENIOR PROJECT MANAGER

“Working at Hubbell has allowed me to construct many different types of buildings across the Des Moines area. The success of each of those projects was based on a foundation of trust cultivated from the first meeting with the client.”

John brings over nineteen years of construction management experience to Hubbell Construction Services, having served previously as a Field Engineer, Superintendent, and Project Manager throughout central Iowa. Through his past performance in the various roles of the construction process, John understands the needs and demands of all parties involved. This insight gives him greater ability to deliver projects on time and on budget.

**EDUCATION**

Bachelor of Science in Construction Engineering Technology  
University of Nebraska at Omaha.
